

Bringing Experience and Innovation to Controls Engineering

CONTROL SYSTEM INTEGRATION

Design, Programming and Installation

EXPERIENCE

APEX Controls engineers have built a reputation of excellence by applying the latest products and technologies to electrical control system integration.

We have confidence that our core belief, "we must conduct ourselves with integrity and honesty while serving the needs of others", has earned us the respect and repeat business of our customers.

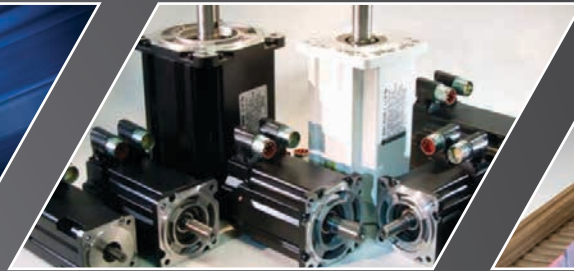

We take pride in caring for our employees.

CORE DISCIPLINES

- ▲ PLC Systems
- ▲ Operator Interface
- ▲ Robotics
- ▲ Motion Control
- ▲ Machine Vision
- ▲ Custom Software

INNOVATION

APEX Controls is a technology and innovation leader specializing in machine and process control system integration.

What sets us apart is our ability to offer complete turnkey installations, coordinating complex data system infrastructure with electrical design.

By partnering with leading manufacturers, APEX Controls offers industry expertise and extensive knowledge of automated machines and processes.

APEX Controls provides **innovative solutions from sensor to server.**

SOLVING AUTOMATION CHALLENGES

System Integration for automating machines and processes

CONTROLS ENGINEERING

APEX Controls Engineers are knowledgeable, experienced and ready to assist your team from project conception through testing, troubleshooting and launch.

We provide **complete controls engineering and system integration services** including design, documentation, programming, panel assembly, machine wiring, installation and start-up.

Bringing Experience and Innovation to Controls Engineering

▲ Experience ▲ Integrity ▲ Innovation

PANEL BUILD and MACHINE WIRING

From the beginning, APEX Controls has chosen to build control panels in house. **This allows complete control over quality and delivery.** Additionally our customers benefit as our electricians are skilled at interpreting electrical drawings, building panels and wiring machines.

- ▲ Experienced machine wiring electricians
- ▲ Custom designs and UL 508A panels
- ▲ 6000 sq.ft. panel shop
- ▲ FAT — Factory Acceptance Tests
- ▲ Turnkey or T & M
